

JOINT AND CRACK SEALANTS

## ABOUT US

## STENKIM CONSTRUCTION CHEMICALS

Stenkim® Construction Chemicals, established in 1986, is a leading producer of construction chemicals with a comprehensive portfolio spanning specialized sealants, flooring systems, coatings, admixtures, concrete repair and reinforcement products, waterproofing materials, and polycarboxylates. Building on over three decades of engineering excellence and chemical innovation, we have consistently developed breakthrough solutions that outperform multinational competitors. Our commitment to innovation extends across all product lines, from our pioneering specialized construction chemicals developed over 35 years ago to our newer technologies like polycarboxylates. We are often the first and sometimes the only domestic producer of many innovative construction materials.

Our agile structure, commitment to continuous improvement, passion and drive have enabled us to grow consistently over the years. The guiding principle of Stenkim® is to exceed industry standards through innovative solutions. We achieve this with our expert design engineers, advanced production and R&D facilities, and proprietary technologies. The exceptional performance of Stenkim® products stems from rigorous quality control at every stage - from raw material selection to final product certification. This commitment to excellence extends beyond our products to encompass comprehensive technical support and collaborative relationships with all our stakeholders.

# StenSeal® PU JFR

Jet Fuel Resistant, Cold Applied, Polyurethane Based, Single Component Joint Sealant

## Standards

TS5926 EN 141882 (Type D), ASTM C 920 (Type S, Grade P, Class 25, Use T)

<b>Packaging</b>	Cans / Sausage
<b>Net Volume</b>	14 kg / 600 ml

Images are for illustrative purposes only. Actual packaging may vary depending on the product specifications at the time of order.

## StenSeal® PU JFR NS

Thixotropic type for vertical and overhead applications.

# StenSeal® SI 110

Self-Levelling, Silicone Joint Sealant

## Standards

ASTM D 5893, Type SL, ASTM C 920, Type S, Grade P, Movement Class, 100 and EN 141882, System S, Class A, Type SL.

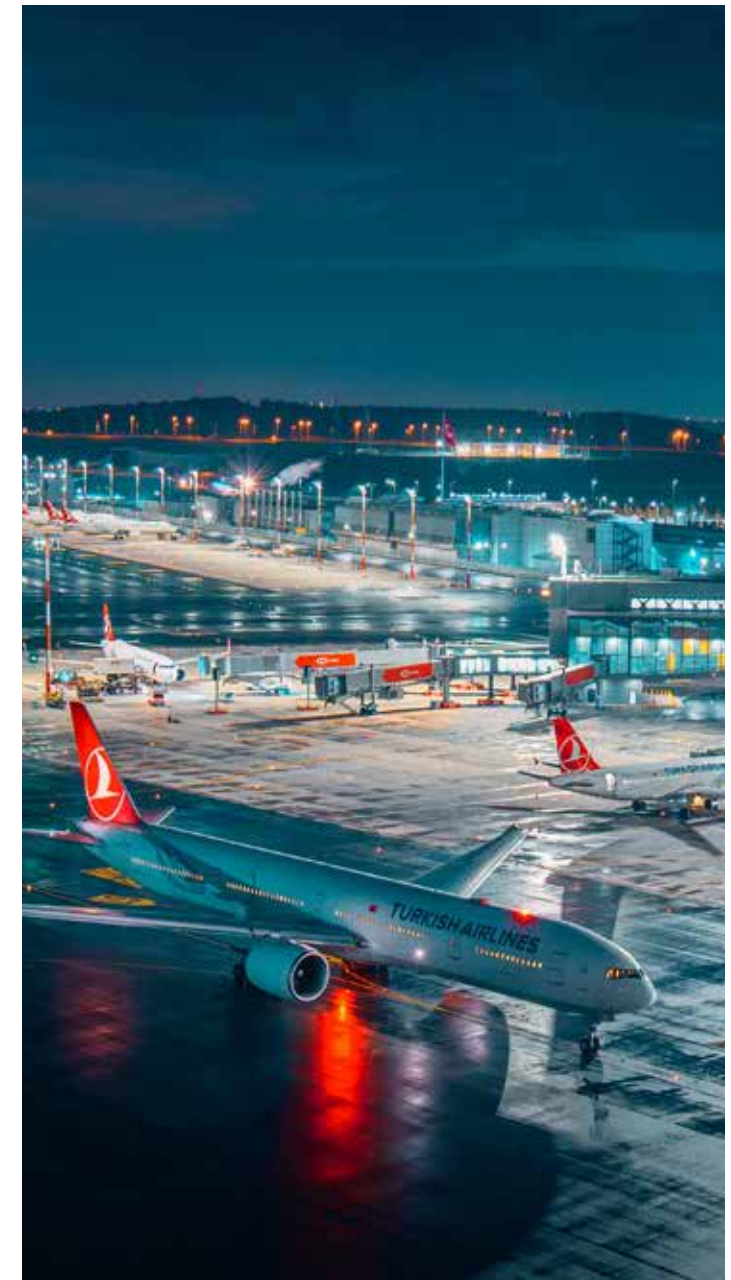

Packaging	Cans/Sausage	Cartridges	Drums	Drums
Net Volume	14 kg/600 ml	29 fl oz	5 gal (18.9 l)	50 gal (189 l)

Images are for illustrative purposes only. Actual packaging may vary depending on the product specifications at the time of order.

## StenSeal® SI 111

Thixotropic type for vertical and overhead applications.

# StenSeal® 2PS 110

Water and Chemical Resistant, Self-Levelling Polysulfide Sealant, Two Component

## Standards

Classified as Type M, Grade P, Class 50, Use T according to ASTM C920.

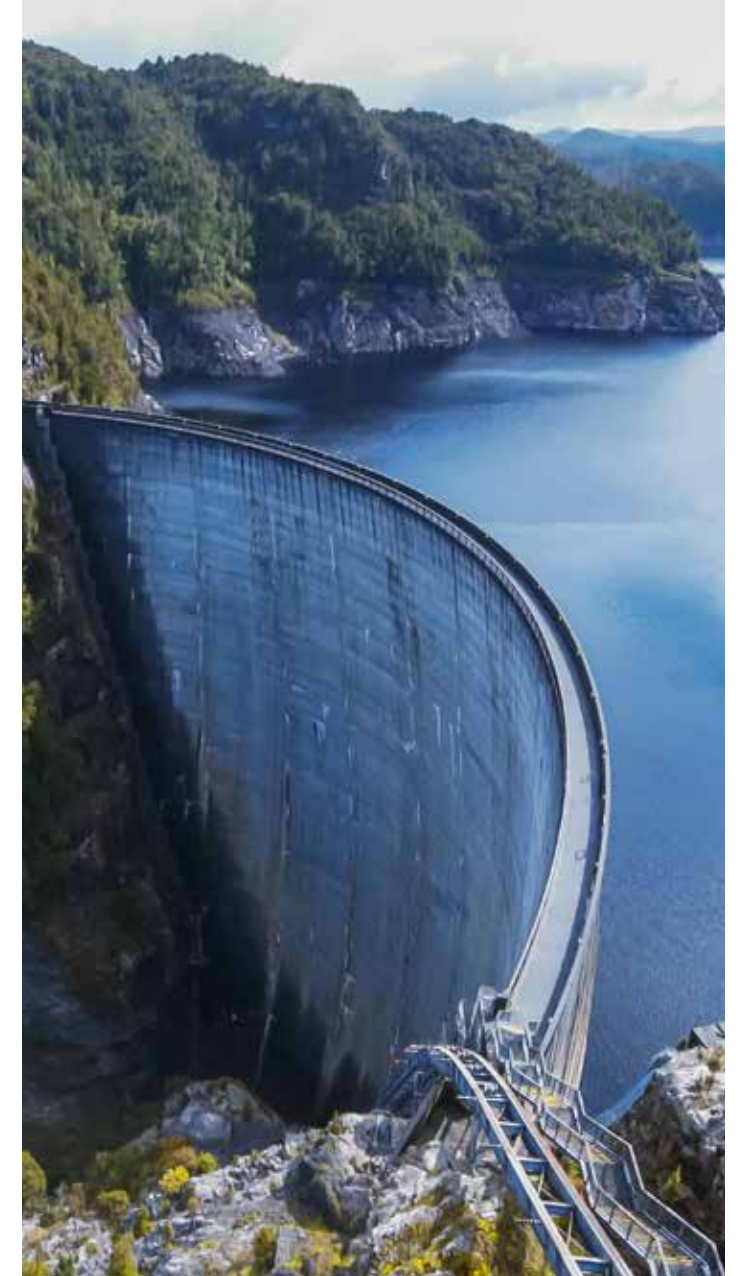

<b>Packaging</b>	Cans - Two Component Set (A+B)
<b>Net Volume</b>	12.5 kg

Images are for illustrative purposes only. Actual packaging may vary depending on the product specifications at the time of order.

## StenSeal® 2PS 111

Thixotropic type for vertical and overhead applications.

# StenSeal® 2PT 210

Jet Fuel Resistant, Cold Applied, Self-Levelling Polyurethane Sealant, Two Component

## Standards

Type M, Grade P, Class 25, Use T according to ASTM C920.

<b>Packaging</b>	Cans - Two Component Set (A+B)
<b>Net Volume</b>	12.5 kg

Images are for illustrative purposes only. Actual packaging may vary depending on the product specifications at the time of order.

## StenSeal® 2PT 211

Thixotropic type for vertical and overhead applications.

# StenSeal® 2PT 210 MU

Jet Fuel Resistant, Machine Applied, Quick Setting, Polyurethane Sealant, Two Component

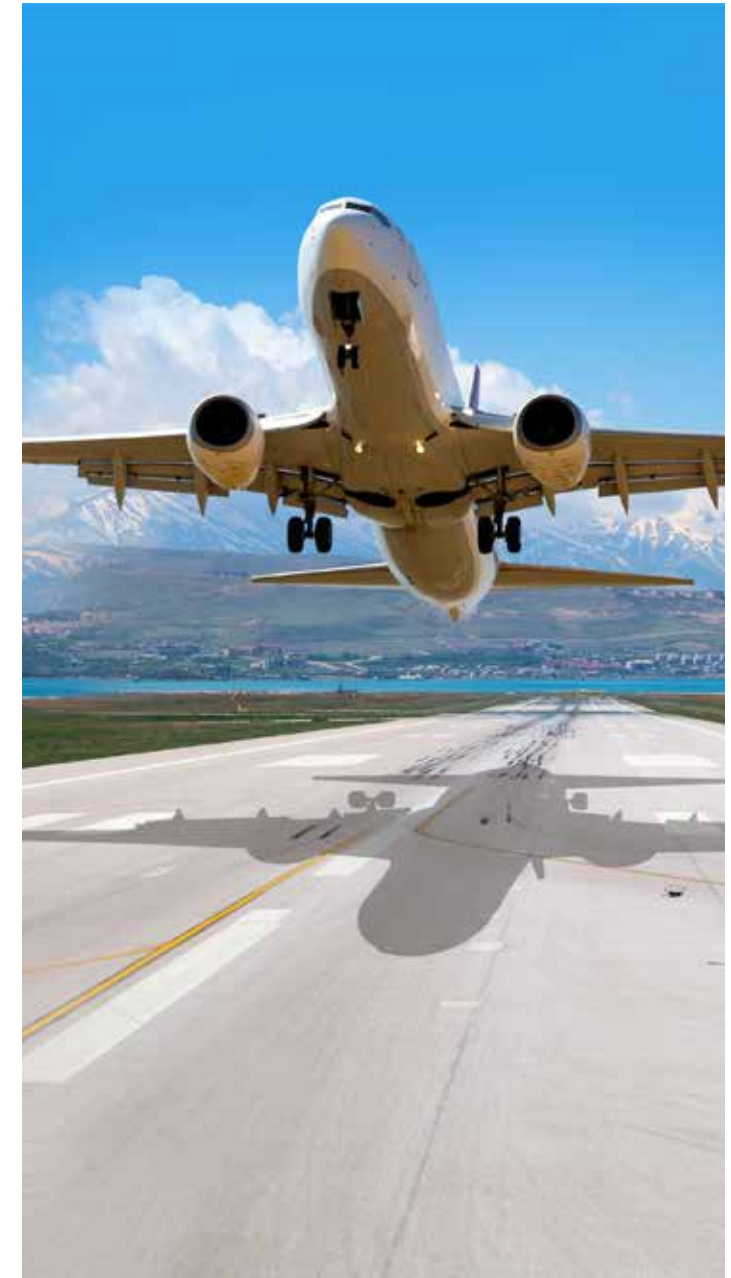

## Standards

Type M, Grade P, Class 25, Use T according to ASTM C920.

<b>Packaging</b>	Cans - Two Component Set (A+B)
<b>Net Volume</b>	45 kg

Images are for illustrative purposes only. Actual packaging may vary depending on the product specifications at the time of order.

# StenSeal® PU Series

Sausage Type, Cold Applied,  
Polyurethane Sealant

<b>Packaging</b>	Sausage
<b>Net Volume</b>	600 ml

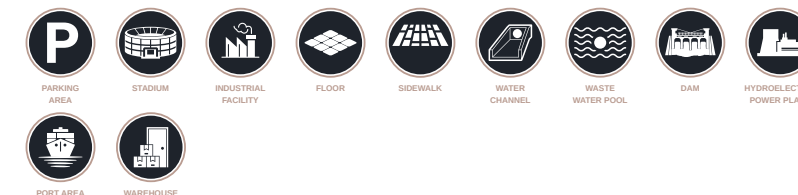

Images are for illustrative purposes only. Actual packaging may vary depending on the product specifications at the time of order.

StenSeal® PU 102

StenSeal® PU 202

StenSeal® PU 300

## StenAst® S

General Purpose, Single Component,  
Surface Conditioner

Single component, silanebased surface conditioner, prepared for all Stenkim® brand polymerbased surface coating materials, top coats and joint sealants.

StenAst® S is available in 2.5 kg packages.

Images are for illustrative purposes only. Actual packaging may vary depending on the product specifications at the time of order.

## StenAst® SPS

General Purpose, Single Component,  
Surface Conditioner

Single component, silanebased surface conditioner, prepared for all Stenkim® brand polymerbased surface coating materials, top coats and joint sealants.

StenAst® SPS is available in 2.5 kg packages.

## StenAst® SI

General Purpose, Single Component,  
Surface Conditioner

Single component, silanebased surface conditioner, prepared for all Stenkim® brand polymerbased surface coating materials, top coats and joint sealants.

StenAst® SI is available in 2.5 kg packages.

## StenAst® SC

General Purpose, Single Component,  
Surface Conditioner

Single component, silanebased surface conditioner, prepared for all Stenkim® brand polymerbased surface coating materials, top coats and joint sealants.

StenAst® SC is available in 2.5 kg packages.

## StenAst® PT

Single Component Primer for Asphalt  
Surfaces

Primer for asphalt surfaces based on concentrated refined coal tar modified with polymers, solvents, additives and fillers improving adhesion.

StenAst® PT is available in 3 kg packages.

# STENKIM'S OTHER PRODUCTION AREAS

Floor Coatings

Concrete Admixtures, Curing Agents and Repair Materials

Special Paints and Protective Coatings

Injection Resins

Waterproofing

Water and Oil Repellents

Polycarboxylate
